Transferable Skills

My love of visual media assists me to thrive when I am either on set or in the creative stages of a production. This coupled with my social personality and my love of people creates a dynamic combination which is most suited in the media industry. I am very calm under pressure and love working in a team towards a collective creative outcome. I endeavour to Direct TVC's and or music videos so my technical and story telling skills can develop which will assist me when I embark on my ultimate goal, directing feature length dramas
